*Spectrum of possibilities*

## About Us

Colormaster Pvt. Ltd. is a trusted supplier of high-quality plastic masterbatches and polymer additives, committed to delivering consistent performance, superior color dispersion, and reliable processing solutions to the plastics industry.

With strong technical expertise and modern industry practices, we specialize in White Masterbatches, Black Masterbatches, Colour Masterbatches, Additives Masterbatches, Filler Masterbatches, and Roto Foam Powder. Our products are designed to enhance the appearance, strength, and functionality of plastic products across diverse applications.

At Colormaster Pvt. Ltd., quality is at the core of everything we do. We use premium raw materials, advanced compounding technology, and strict quality control measures to ensure uniformity, excellent dispersion, and cost-effective solutions tailored to our customers' specific requirements.

Our customer-centric approach, timely delivery, and commitment to innovation have helped us build long-term relationships with clients across various industries including packaging, molding, extrusion, and rotational molding. We continuously invest in research and development to stay aligned with evolving industry standards and market demands.

Colormaster Pvt. Ltd. stands for reliability, consistency, and excellence—adding value and color to every polymer we serve.

## Our Vision

### Attain and Maintain Leadership Status in Our Chosen Field of Business

- ✔ Focusing all our actions towards Total Customer Satisfaction.
- ✔ Continuously striving to innovate our processes, products and services to generate value for money in all our efforts - both internal and external.
- ✔ Making total employee involvement, sincerity of purpose and commitment to objectives as the foundations of this vision.

## Our Mission

### Adding Value

Our mission is a statement of what we stand for. It touches our interactions, activities and relationships with all our stakeholders. The way we do our business, our work culture, our quality perspectives, our obsession with innovative technologies and our commitment to our human resources are all singularly focused on enhancing and adding value.

## White Masterbatch

Colormaster Pvt. Ltd. White masterbatches are crafted with uncompromising quality, using premium micronized Titanium Dioxide along with specialised base resins and additives to enhance your end-use applications. Our masterbatches deliver superior whiteness, excellent dispersion and high opacity.

As domain specialists, we offer a diverse range of white masterbatches known for their ability to effectively combine different loads of TiO<sub>2</sub> with specific polymers, ensuring optimal performance and consistency in a variety of products.

With competitive white masterbatch price and consistent supply chain support, we serve a wide customer base ranging from flexible films to injection molding industries. Being a trusted white masterbatch supplier, we ensure every formulation delivers optimum brightness and long-term stability across different plastic substrates.

## Black Masterbatch

Colormaster Pvt. Ltd. Black masterbatches are renowned for their superlative spectrum of highly loaded formulations, utilising various types and grades of carbon. These masterbatches play a significant role in key markets such as Building Materials, Agriculture, Packaging, Electronics, Textiles and non-wovens, Wires and Cables, Automotives, and Toys. Inspired by market demands, our R&D experts continuously inspect and update the existing range, to stay in sync with evolving trends.

This makes us a preferred black masterbatch supplier for industries looking for consistent color strength and minimal processing complications. Whether it's films, pipes, or moulded components, our range of carbon black masterbatch is formulated for reliable performance across various polymers. Being one of the trusted black masterbatches manufacturers in India, we focus not only on appearance but also on functional properties like UV protection, conductivity, and thermal stability depending on the grade. As part of our wider portfolio of masterbatches in India, Colormaster Pvt. Ltd. plastic black masterbatch options also complement our role as a leading colour masterbatch manufacturer, allowing customers to access full-spectrum solutions under one roof.

## Filler Masterbatch

Colormaster Pvt. Ltd. Filler masterbatches, also known as anti-fibrillation masterbatches, enhance product value by improving stiffness, securing edges and reducing costs. They are widely used in applications such as Raffia tapes and FIBC bags, where edge security is crucial to prevent slit tape edge fraying. These masterbatches are designed to offer superior performance, ensuring durability and efficiency in a variety of industrial applications.

## Colour Masterbatch

Colormaster Pvt. Ltd. Colour masterbatches offer a comprehensive range of standard options with an active database of over 2500 shades, compatible with polyolefins (PE and PP), PET, PBT, HIPS, ABS, EVA and Nylon. We pride ourselves on our ability to match any colour you need, customising masterbatches for diverse applications.

Our products are renowned for their excellent dispersion, UV and weather resistance, high brightness and opacity, low LD, good heat resistance, and light fastness. Food-contact compliant and adhering to national regulations, safety is paramount at Plastiblends. With our extensive experience, we are excited to share our expertise, and help you find the perfect masterbatch from our wide range of options.

As a trusted colour masterbatch manufacturer, we understand the importance of visual consistency and regulatory safety, especially for sensitive applications like food-grade packaging and healthcare products. A dedicated plant and team of engineers works to ensure that any ingredient that may cause free radical formation or alter the smell or taste of the final product is eliminated from the formulations. Our facility operates with strict control over raw materials, making us a reliable color masterbatch manufacturer in India for brands that cannot afford any compromise in compliance or product aesthetics. Colormaster Pvt. Ltd. commitment also aligns with broader demands for high-performance colour masterbatches in a wide range of industries, from packaging to personal care.

## Additives Masterbatch

The global plastic industry is heavily dependent on additives, which serve a myriad of functions, leading to continuous evolution in pigment formulations through experiments and testing. This iterative process unveils unique characteristics crucial for optimal performance.

Manufacturers rely significantly on these outcomes to meet sector demands, with additive applications expanding beyond color provision to include achieving sustainability and compliance with diverse regulations, necessitating adaptability to various industrial processes to align with global environmental goals.

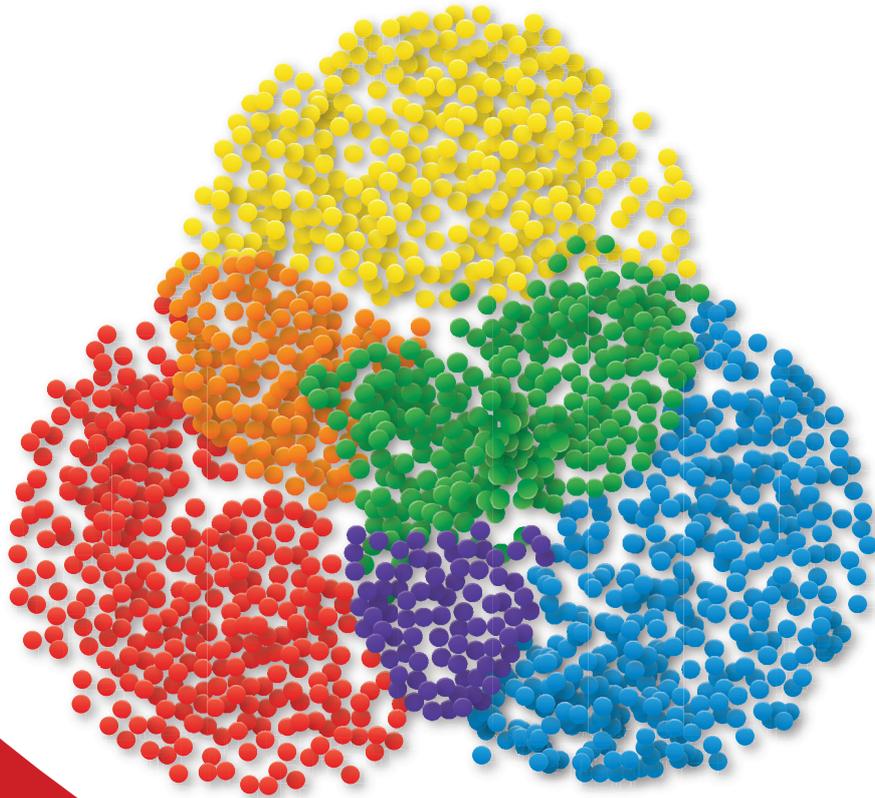

We have a wide range of masterbatches containing a variety of additives which gives us the ability to innovate and enhance solutions for our customers to further strengthen their commitment to quality assurance in this dynamic and evolving landscape.

## Roto Foam Powder

Roto Foam Powder is a high-performance foaming additive specially developed for the rotational moulding (Roto Moulding) process, widely used to produce lightweight yet strong hollow plastic products. During the heating cycle, the foaming agent activates and releases controlled gas, forming a uniform microcellular foam structure inside the moulded article. This internal foam layer significantly reduces overall weight while maintaining excellent mechanical strength and dimensional stability.

At Colormaster Pvt. Ltd., our Roto Foam Powder is engineered to deliver consistent cell structure, smooth surface finish, and reliable processing performance. It helps manufacturers achieve material savings, improved thermal insulation, enhanced stiffness, and better impact resistance, making it ideal for applications such as water tanks, insulated containers, ice boxes, chemical storage tanks, and various industrial roto-moulded products. Our formulations are compatible with LLDPE and HDPE roto grades and can be customized to meet specific density, performance, and end-use requirements, ensuring cost-efficient and high-quality production outcomes.
